

AIMS AND OBJECTIVES

- **Sensitize the academic community to the challenge of climate change and promote effective responses through training initiatives and informational campaigns.**
- **Increase the resilience of universities to climate change, promote the practice of green roofs as a strategy to mitigate environmental impacts in urban institutions.**
- **Promote active and participatory citizenship within the academic community by offering opportunities for civic engagement through learning activities focused on the development of social skills, critical thinking, and environmental awareness.**
- **Recognize the key role of universities in engaging the community to address environmental challenges. Implement actions that reflect the latest European and global priorities to contribute significantly to the fight against climate change**
